Piling under bridge seat shall have a minimum capacity of 30 tons. Piling buildups, if required, will be paid for at the unit price bid for steel piling.

Bidders shall be responsible for the construction of the bridge using materials provided by the county.

Bidders may bid on the 60' steel beam type bridge shown on the plans or may bid other alternate types of bridge structures provided they meet the approval of the Engineer and the County Commission and provide equivalent clear roadway, waterway opening, and safety features as shown on the plans. If a bridge design different from those shown in the plans is low bid the contractor shall submit complete plans and specifications prepared by a registered engineer for review and approval by the County Commission prior to the award of contract. The County Commission reserves the right to reject any alternate type bridge or alternate design features which in their judgement would not provide a structure at this location which is equivalent to that shown on the plans.

The bid is good until the completion of the project.

The Top of Deck elevation shall be approximately 17 feet above the flowline elevation of the creek.

All material shall be new and delivered to the project site.

The new bridge alignment is to be approved by the County Commissioner or the Engineer.

The contractor shall cut the beams to length and perform the repairs listed below at the Grant County District 2 shop prior to delivering the beams to the project site.

The beams are labeled as W99.6, E99.6, E30.2, E31.5, and E98.1.

Beam Repairs:

W 99.6 needs 3' top flange cut out and patched and 10' of channel shear connectors

E 99.5 needs 4' top flange cut out and patched and 10' of channel shear connectors

E 30.2 needs 12' channel shear connectors

E 31.5 needs 3' top flange cut out and patched and 7' channel shear connectors

E 98.1 needs 3' top flange cut out and patched, 8' channel shear connectors, and 10'

of web/bottom flange connection cut out and patched

The contractor shall weld several pieces of HP10"X42# together for wing piles. The county has 19 – 40ft pieces, 2 – 60ft pieces, and several smaller pieces of HP10"X42# piles at the Grant County District 2 Shop.

All cost for Steel Sheet Piling shall be paid for at the unit price bid per square foot for Steel Sheet Piling in place. The sheeting supplier shall furnish to the purchaser a manufacturers certificate of compliance stating that the sheeting furnished meets the above minimum requirements. Alternate Steel Sheet Piling may be used upon approval of the Engineer. Load capacity shall be no less than that provided by section specified above. All Sheet Piling shall be galvanized in accordance with ASTM A653.

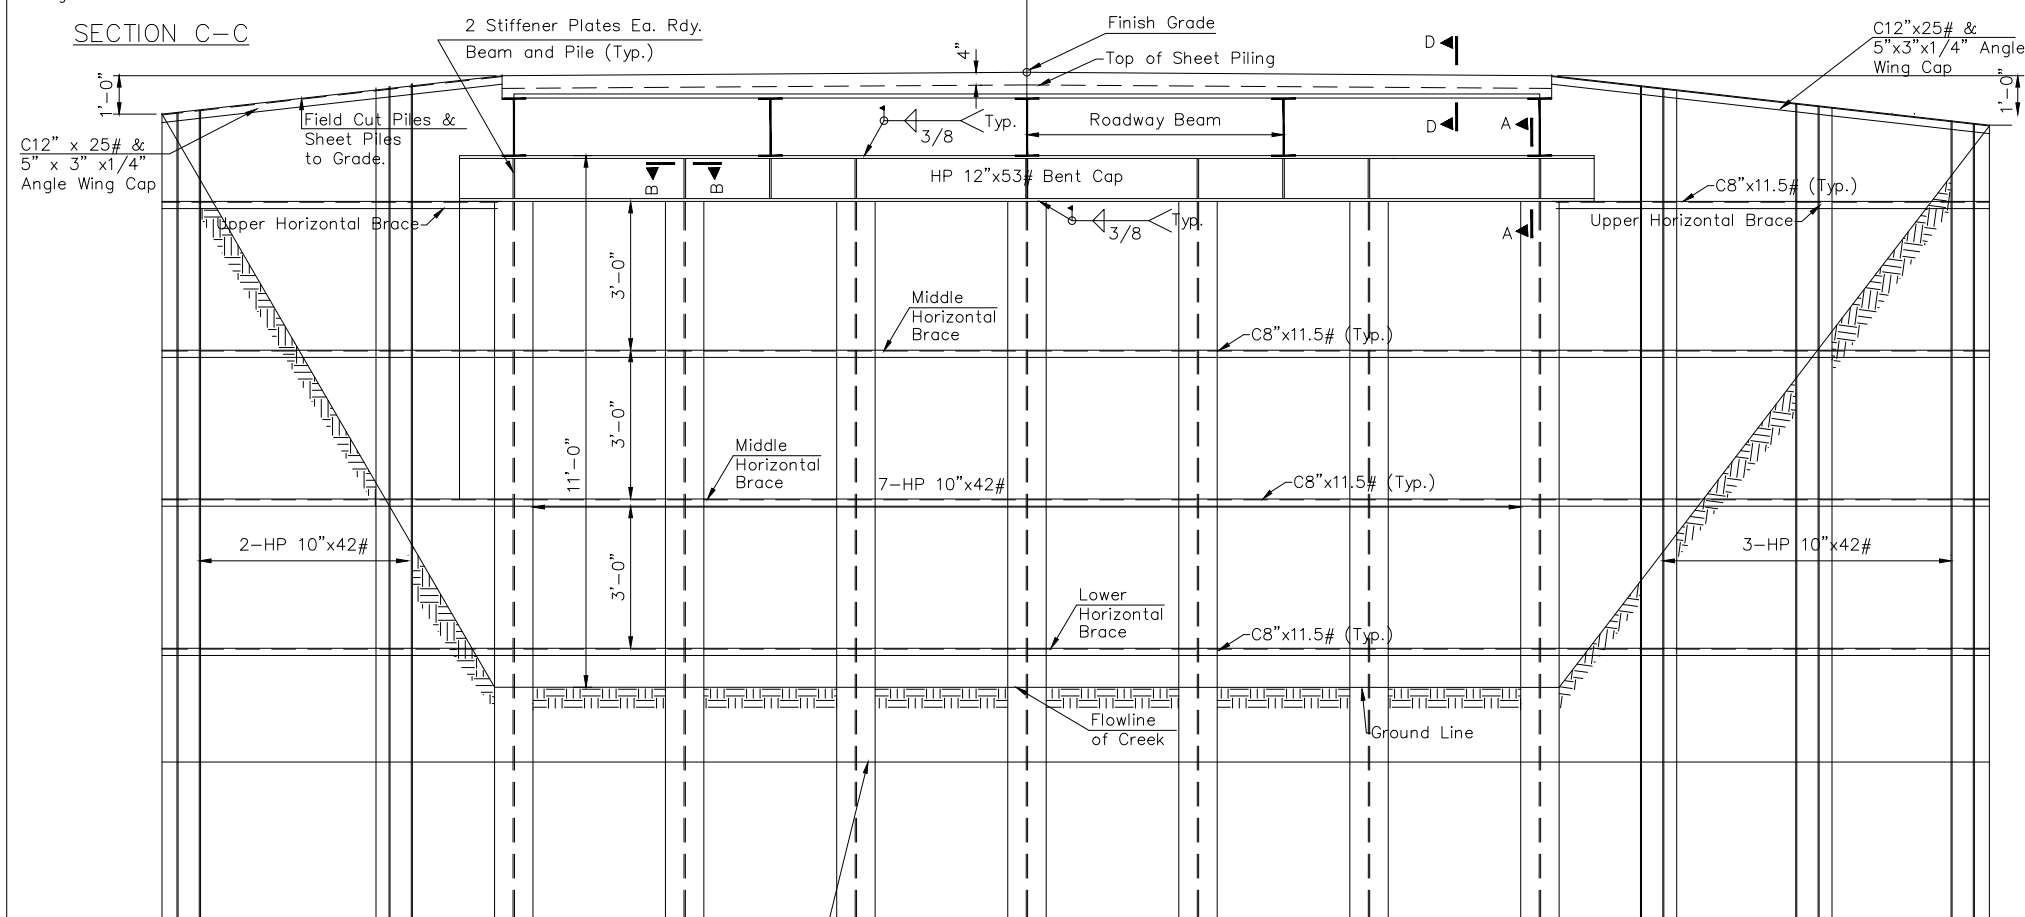

STEEL PILING:

Steel piles shall be driven to a minimum bearing of 30 tons and so that the bottom of the piles are a minimum of 10' below the creek flow line elevation. Bearing value to be determined in accordance with Section 514 of the 2009 Edition of the Oklahoma Standard Specification for Highway Construction.
